

Marvell's Vision for Transforming Cloud Data Centers with CXL

Dan Christman, EVP, Storage Products Group
Thad Omura, VP, Flash Marketing
Ashish Saran, SVP, Investor Relations

May 2022

Forward-looking statements

Except for statements of historical fact, this presentation contains forward-looking statements (within the meaning of the federal securities laws) including, but not limited to, statements related to market trends and to the company's business and operations, business opportunities, growth strategy and expectations, and financial targets and plans, that involve risks and uncertainties. Words such as "anticipates," "expects," "intends," "plans," "projects," "believes," "seeks," "estimates," "can," "may," "will," "would" and similar expressions identify such forward-looking statements. These statements are not guarantees of results and should not be considered as an indication of future activity or future performance. Actual events or results may differ materially from those described in this presentation due to a number of risks and uncertainties.

For factors that could cause Marvell's results to vary from expectations, please see the risk factors identified in Marvell's Annual Report on Form 10-K for the fiscal year ended January 29, 2022 as filed with the SEC on March 10, 2022, and other factors detailed from time to time in Marvell's filings with the SEC. The forward-looking statements in this presentation speak only as of the date of this presentation and Marvell undertakes no obligation to revise or update publicly any forward-looking statements.

Dan Christman

EVP, Storage Products Group

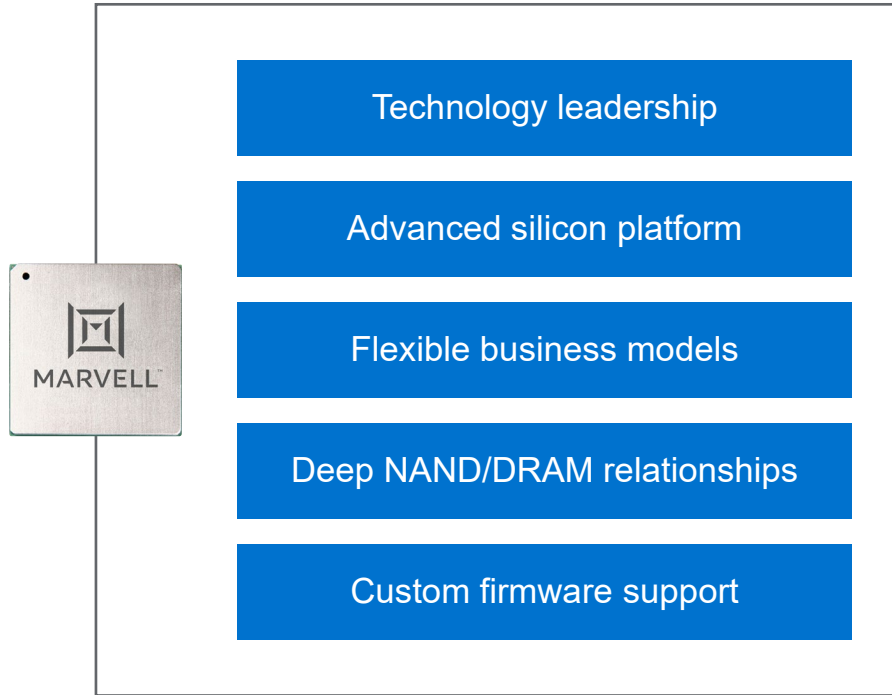

Storage products group business

Expanding our market opportunity

Uniquely positioned to win in storage and memory

Thad Omura

VP, Flash Marketing

Cloud data center memory challenges

Memory tied-down to xPUs

Cannot share

Bandwidth per core declining

Source: Meta, OCP Summit Presentation Nov 2021

Degrades efficiency

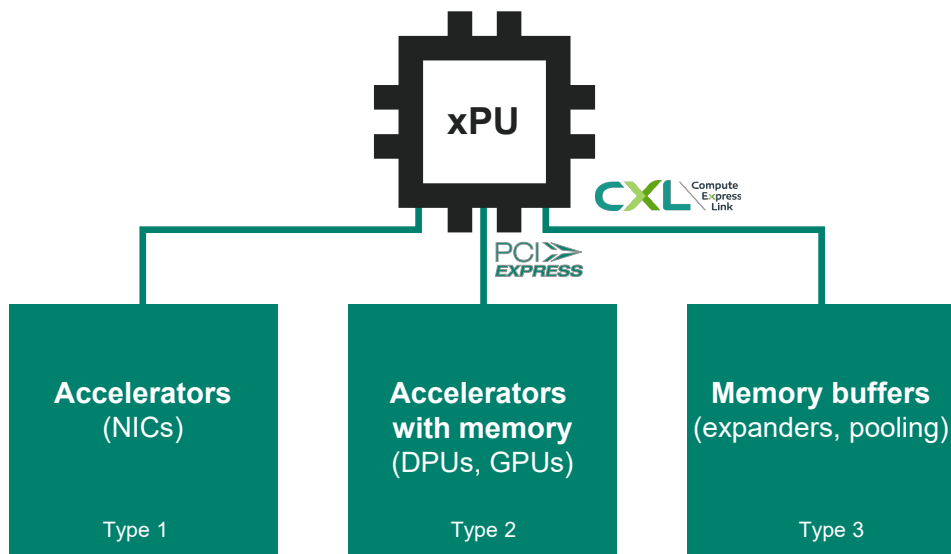

No near-memory compute

Limits performance

CXL is poised to address these issues

What is Compute Express Link (CXL)?

- Industry standard protocol
- Runs over PCI Express
- Low-latency interconnect
- Memory-optimized
- Cache-coherent

Tremendous ecosystem momentum driven by data center leaders

Cloud data center memory challenges

Memory tied-down to xPUs

Cannot share

Bandwidth per core declining

Source: Meta, OCP Summit Presentation Nov 2021

Degrades efficiency

No near-memory compute

Limits performance

CXL is poised to address these issues

Cloud data center memory challenges

Memory tied-down to xPUs

Bandwidth per core declining

No near-memory compute

CXL Expander

CXL Expander

CXL Accelerator

CXL Pooling

CXL Switch

CXL is poised to address these issues

Addressing memory expansion

DIMM challenges

- Limited scalability
- Not serviceable
- No telemetry

CXL solution

- Scalable
- Pluggable
- Telemetry
- Improved thermals
- Mix-and-match DRAM
- Config flexibility

CXL memory expanders improve performance

Today: 2 DIMMs per channel (2DPC)

1DPC same bandwidth as 2DPC

1DPC + CXL Expanders

Use PCI Express to open bandwidth

Same capacity with greater bandwidth and utilization

Sharing memory with CXL

CXL Pooling

- Pool memory across multiple xPUs
- Rescue under-utilized DRAM
- Scale memory independent of xPUs

CXL Switch

- Flexible to connect resources into fabric
- Scalable, serviceable
- Enables fully composable infrastructure

Accelerating with CXL

CXL Accelerator

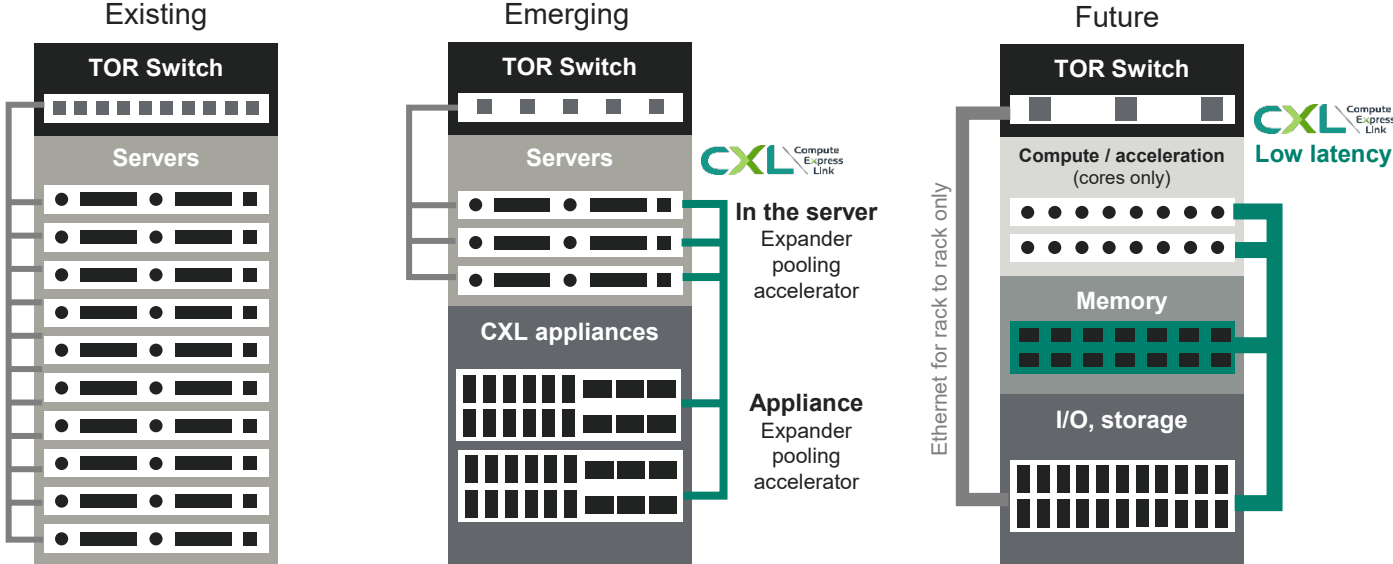

- Coherent, efficient
- Accelerate analytics, ML, search, etc.
- Improves efficiency and TCO

CXL I/O Acceleration

- DPU/NIC, SSD, ...
- Accelerate protocol processing
- Composable I/O devices

CXL data center vision: full composability

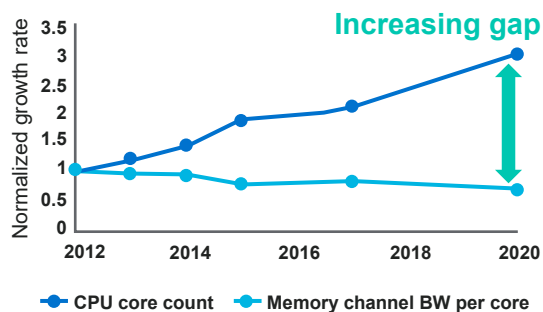

Cloud data center memory challenges

Memory tied-down to xPUs

Bandwidth per core declining

Source: Meta, OCP Summit Presentation Nov 2021

Degrades efficiency

No near-memory compute

Limits performance

CXL is poised to address these issues

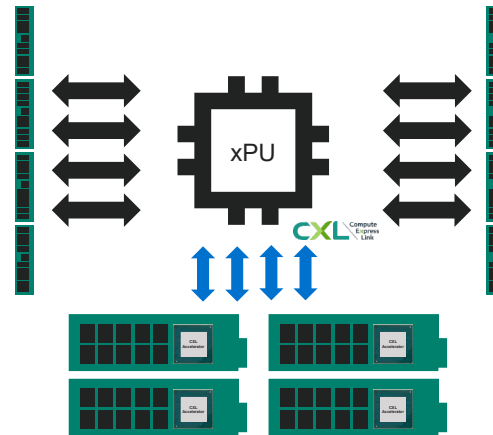

CXL *solves* data center memory challenges

Disaggregated memory

Fully composable

More bandwidth per core

Optimize efficiency

Near-memory computation

Ultimate performance

CXL is disrupting cloud data center architectures

CXL technology roadmap

CXL 1.1

Architect

Memory Expanders

PCIe 5

CXL 2.0

Deploy

- + Pooling
- + Switch
- + Accelerators
- + I/O

PCIe 5

CXL 3.0

Scale

- + Full hot plug
- + Switch w/ composability

PCIe 6

Comprehensive end-to-end CXL solutions

CXL opportunities

- Expanders
- Pooling
- Switch
- Accelerators
- Custom Compute
- DPUs / SmartNICs
- Electro-optics
- Re-timers
- SSD Controllers

Multi-billion \$ opportunity

Summary

- 1 CXL is disrupting cloud data center architectures
- 2 Uniquely positioned to enable end-to-end CXL in data center
- 3 CXL is driving the next multi-billion-dollar opportunity

Thank You

Essential technology, done right
