Dear Business Partner:

Re: Russia Sanctions

In response to Russia's actions in Ukraine, the United States, European Union, and many other allied countries have either already implemented sanctions against Russia or are in the process of implementing sanctions against Russia. Marvell Technology, Inc., its subsidiaries, and affiliates ("Marvell") is committed to complying with the US Government's Rule: *Implementation of Sanctions against Russia* that went in effect on February 24, 2022, and any other applicable rules governing Marvell's import, export, reexport or transfer (in country) of hardware, software, and technology ("Marvell products").

In accordance with the language of the sanctions currently in place and in anticipation of the issuance of additional sanctions that may be imposed in the near future, Marvell is stopping all transactions of its products directly and indirectly to customers based in Russia, Belarus, Donetsk People's Republic (DNR) and Luhansk People's Republic (LNR) regions of Ukraine.

Marvell expects its partners to also comply with the applicable export control laws and regulations, and therefore, asks your company to take necessary steps to discontinue any direct or indirect shipments and support for Marvell products to customers in Russia, Belarus, Donetsk People's Republic (DNR) and Luhansk People's Republic (LNR) regions of Ukraine effective immediately.

If you have any questions, please reach out to Marvell Global Trade Compliance at exportcompliance@marvell.com

Thank you.
