

As you start deploying next-generation Servers and Storage solutions from Dell to your clients, connectivity between these devices becomes critical. Unfortunately, there isn't a whole lot of training available to keep you up to date on the latest connectivity technologies.

That's why we are inviting you to attend the Marvell Coffee Talk Webinar Series, exclusively for Dell Sales and Presales professionals. In these short, 30-minute sessions, you will receive the latest information pertaining to server and storage connectivity for Dell solutions from the I/O experts on the Dell OEM Team at Marvell. This is an easy way for you to stay in the know, get your questions answered and become an even better trusted advisor for your clients. Just click the links below to register today.

Members of the Dell Connect the Q Program from the AMS region will receive 500 points for each webinar they attend. You must attend at least 80% of the session to receive credit.
