

Marvell APAC Connectivity Webinars for HPE Field and Partners

Last Update: 4/15/2022

Connectivity is Required! And you need to be on top of your game to know how to select the right I/O technology for the solutions you are building for your customers.

Marvell's HPE Team of experts will be conducting a series of 20-30 minute "Connectivity" sessions on discussing how Marvell I/O technology for HPE can differentiate the server, storage and networking solutions you are deploying today.

These are short, to the point presentations to enable you to increase your understanding of storage and I/O technology available for HPE Server, Storage, and Networking solutions. Remember, I/O connectivity is required in every server and storage opportunity. Now is your chance to stay ahead of the competition and be a better trusted advisor to your clients. Here's the list of upcoming webinars. Register today!

Members of the [Marvell Follow the Wire Rewards Program](#) from the APAC region will receive **500 points** for each webinar they attend. **Must register with valid Business Email address and attend at least 80% of the session to receive credit.** If you would like to become a member of the program, enroll today at www.ftwrewards4hpe.com.

June 8, 2022 11-11:30AM UTC+8	Fibre Channel and Virtual Machine ID (VM-ID) – We will discuss Virtual Machine ID technology for Fibre Channel SANs and how this provides monitoring of the SAN traffic at the VM/workload level.	Register Here
July 13, 2022 11-11:30AM UTC+8	Universal SAN Congestion Mitigation (USCM) – This session is focused on Universal SAN Congestion Mitigation. As more high-performance, NVMe-native storage gets deployed, SAN Congestion or "slow drain" becomes a bigger issue. Learn why this is the case and what the Fibre Channel Industry and Marvell are doing to address this potential issue for your clients.	Register Here
Aug 10, 2022 11-11:30AM UTC+8	NVMe over Fabric Protocols – Join the discussion where we will compare the different NVMe over Fabric protocols. This will include discussions on NVMe/RoCE, NVMe/TCP and FC-NVMe.	Register Here
Sept 14, 2022 11-11:30AM UTC+8	Tools, Resources and Utilities – In this webinar, we will provide an overview of the sales and technical tools, resources, and utilities available to support the deployment of Marvell technology in HPE server, storage and networking applications.	Register Here
