28 Gbaud Quad-Channel, Linear Differential Input, Single-Ended Output EML Driver

**Description**

The IN2834SZ is a 28 Gbaud quad-channel linear differential input, single-ended output driver with SMT Interface for 400G CFP8 and DDQSFP EML PAM4 applications.

The device has excellent THD and high bandwidth. The IN2834SZ has adjustable gain and includes an output peak-detector function.

The IN2834SZ is available in an RoHS6-compliant hybrid package with SMT interface and AC-coupled inputs, high-speed bias-T at the output, and EML DC bias-T inside package.

**Part No.**
IN2834SZ

**Product Type**
Linear Drivers

**Market Segments**
Inside Data Centers

**Applications**
400G CFP8 and DDQSFP EML PAM4 applications

**Features**
- Supports baud rates up to 28 Gbaud
- AC-coupled inputs and bias-T outputs
- Differential input, single-ended linear output
- Adjustable gain
- Manual Gain Control (MGC)
- High electrical bandwidth
- Excellent THD
- Peak detector outputs
- RoHS6-compliant package
- Thermal down
- L2 reliability GR468
- Unconditionally stable and exempt of any spurious tones or oscillation either in-band or out-of-band

To deliver the data infrastructure technology that connects the world, we’re building solutions on the most powerful foundation: our partnerships with our customers. Trusted by the world’s leading technology companies for 25 years, we move, store, process and secure the world’s data with semiconductor solutions designed for our customers’ current needs and future ambitions. Through a process of deep collaboration and transparency, we’re ultimately changing the way tomorrow’s enterprise, cloud, automotive, and carrier architectures transform—for the better.
