COLORZ® II 400ZR+ QSFP-DD

Description

The COLORZ® II 400ZR+ QSFP-DD is a pluggable Digital Coherent Optics (DCO) transceiver. This DCO can be plugged into compatible switches and routers for coherent transmission of 400GbE signals over DWDM links up to 400 km.

The transmitter is tunable over the ITU C-Band 12.5 GHz flex grid. The COLORZ II 400ZR+ QSFP-DD includes a narrow linewidth tunable laser, Silicon Photonics Modulator ICR, and a DSP.

Optical signals are transmitted and received from the module by standard duplex SMF and LC receptacles.

The client/electrical interface is compatible with IEEE P802.3bs 8 lane 56G PAM-4, as used for “gray” datacenter optical transceivers, for example 400GBASE-DR4. COLORZ II 400ZR+ modules are mechanically and electrically compatible with the QSFP-DD MSA and utilize a 76-Pad electrical connector.

The COLORZ II 400ZR+ QSFP-DD utilizes 7 nm coherent DSP technology, including its low power SD-FEC as well as innovative silicon photonics, driver, and TIA technology to provide coherent transmission performance previously only available on lower density, higher power, and higher cost systems.

Part No.
IN-Q3JX1-TC

Product Type
COLORZ II (400ZR+)

Market Segments
Between Data Centers

Applications
Data Center Interconnects (DCI)
Metro DWDM up to 400 km

Features

• Compatible with the QSFP-DD MSA
• Compatible with Common Management Interface Specification (CMIS) Rev. 4.1 and OIF CMIS
• 400 Gbps with single optical carrier (60 Gbaud, 16QAM)
• Transmission of 400GbE signals of duplex SMF
• Fully C-Band tunable
• DWDM wavelength spacing options
• Advanced 7 nm Coherent DSP technology
• Integrated, Soft Decision LDPC Forward Error Correction (SD-FEC) encode/decode
• Host and network loopback functionality
• Supports IEEE 802.3bs 400GAUI-8 and 4x100GAUI-2 host interface
• Two-wire management interface (TWI) with extended digital diagnostic monitoring and alarm functions

To deliver the data infrastructure technology that connects the world, we’re building solutions on the most powerful foundation: our partnerships with our customers. Trusted by the world’s leading technology companies for 25 years, we move, store, process and secure the world’s data with semiconductor solutions designed for our customers’ current needs and future ambitions. Through a process of deep collaboration and transparency, we’re ultimately changing the way tomorrow’s enterprise, cloud, automotive, and carrier architectures transform—for the better.
